

Release Notes

OS Build 20330

For Mesa 2 Rugged Tablets Running the Windows 10 Pro Operating System

These notes include important information for our Mesa 2 customers regarding the most recent release of the Windows 10 Pro operating system.

Documentation and software updates are located on our website here: <https://www.junipersys.com/support>.

Updates and Resolved Issues Contained in the OS for new Devices

- In the Touch Profiles app the Wet and Glove profile versions were updated for some displays.
- The Intel Graphics Driver was updated to version 15.33.53.5161.
- The ValleyView2 Intel Driver was updated.
- BIOS 26 is required or else a Windows Update will override some drivers and the touchscreen will not work.
- Patch 20330.2 works around a bug where querying the driver date might swap the day and month, causing the patch to fail. It also prompts the user to install UEFI-BIOS version 26 before running this patch.
